

Industrial Electrical Engineer

- Experienced Industrial Electrical Engineer
- Based in South Auckland
- Competitive remuneration package

Brightwater Engineers Limited is one of New Zealand's leading engineering service providers offering engineering and maintenance solutions throughout Australia and New Zealand.

We are seeking a motivated, personable and reliable person to fill a vacancy in our electrical engineering discipline based at our New Zealand Steel Glenbrook Office near Waiuku. You will have a broad generalist background with the ability to adapt to the demands of small to large scale projects.

Candidates will have:

- Experience in engineering, implementation and management of electrical projects
- Familiarity with PLC and SCADA function
- Experience with AC motor drives, LV power distribution and industrial networks
- A tertiary qualification in electrical, automation or mechatronics (BE/BSc preferred) with at least 6 years since qualifying or a trade background with additional engineering and design experience

Common attributes include:

- An excellent attitude to Health and Safety
- An ability to work unsupervised and use initiative
- An ability to work comfortably in a team environment
- An ability to relate well to clients, senior management and peers
- An ability to produce high quality work with good attention to detail
- Excellent communication skills
- Office computer skills to a level expected from any modern business

This vacancy is available for an immediate start, please register your interest in this role today by submitting your application to careers@brightwater.co.nz

All applications will be treated with the strictest confidence and close Friday 22 August 2014.

We are also seeking an experienced Industrial Mechanical Engineer, please refer to <http://www.brightwater.co.nz/careers/> for more details on all of our vacancies.
