

RIDER BLOCK

Brightwater Rider Blocks are built to handle the harsh New Zealand forestry conditions. The large 500mm Tommy More sheave reduces rope wear. The Rider Block also features a quick release shackle and swivelling cheek plates, allowing the rope to be fitted from either side.

FALL BLOCK

Brightwater Fall Blocks are built to be robust and rugged in the field. The large 360mm Tommy More sheave reduces rope wear and 50mm skiving allows for rollover shackle on the skyline. The Fall Block also features a quick release shackle and swivelling cheek plates, allowing the rope to be fitted from either side.

SHOTGUN CARRIAGE

Brightwater Shotgun Carriages are built for longevity and durability in the field. 360mm Tommy More Sheaves allow rollover shackle passing. Strop attachment lugs lie flush under the side plates when sliding along the ground, reducing wear. The Shotgun Carriage is a compact height for good clearance at edge of skid slide and also has trip doors for easy access.
