FORESTRY GUARDING PACKAGES

COMPLETE FORESTRY GUARDING SOLUTIONS

Brightwater offers complete Forestry Guarding solutions specifically designed to ensure loggers get the most durable guarding packages built to the highest quality standards. Constructed at Brightwater's forestry workshop by staff who collectively have over 75 years of forestry experience, all guarding packages are customised to guarantee loggers receive the best fit for purpose solution and value for money.

Options:

Purpose Built Cabs

Constructed using reinforced grade 350 steel and poly carbonate glass. The top hatch and side door are accessible from the outside and the two side opening windows give added escape options in an emergency. All cabs come standard with heavy duty hinges and a hydraulic door with stand alone powerpack.

Rops Cabs

Rops Cabs with OPs and Fops emergency exits, front grill, front and rear light protection and aerial mount.

High and Wide

Full cut back and fabricated to look factory new. Engineered with grade 350 steel to factory specifications. Heavy duty belly clamped not bolted to allow for chassis movement.

Track Guards- Carrier Roller Conversion (Full Length)

Bottom rollers fitted to the top for strength and longevity. The track guards are side mounted for easy access, removal and strength.

Hydraulic Bonnet

Fully hydraulic bonnets with stand alone hydraulic powerpacks with safety lock valves. Engine fully sealed to keep airflows as standard, all hatches fitted with mesh screens to keep out forest residue.

Rear Bonnet and Camera Protection

Full side guarding with rails. Heavy duty hinges, latches cross brace behind cab for side strength.

Bulldozer Guarding and Winch Fairlead

Full Bulldozer guarding, sweeps side rails, winch fairleads and track guards.

Boom Highlifts

Fully line-bored centre pivot with side plates bored and pressed on to give extra strength to the welded area. All high lifts are built to pick up OEM gusseting etc.

Boom Modifications for Hoses

Many different options available for full boom guarding and hose through guarding. Options also include; boom straightening as well as boom and stick lengthening.

Additional Options:

Access rails

Rear kicker plate to protect doors and provide secure hinge and rail mounting

Corner post and tool box

Robust door latches

Access steps in toolbox to allow easy access to engine

Lift ram guard mounting
